

DROP OFF SYSTEM

The drop off system used on our runs (except where stated otherwise) works as follows:-

There is a lead rider wearing an orange HI Visibility tabard

There are two tail end riders wearing orange Hi Visibility tabards
At each junction the two riders behind the lead rider will drop off and wait to direct all the following riders. The lead rider will indicate where to wait. When the two tail end riders appear, THEN AND ONLY THEN, can the two drop off riders leave their position and rejoin the ride in front of the two tail end riders and so the process continues.

The two tail end rider must and will always continue riding. If an incident or breakdown occurs it should be dealt with by a buddy.

NOTE We have included two Creepy Crawly runs in the calendar, with different start points around the County. These runs are for eligible machines, regardless of capacity of power. They are intended for those who have veteran or vintage bikes but do not want to use them on the normal ride outs because they would prefer

To have shorter rides

To avoid too many bikes on their machines

To trailer/van their bikes to start/end points if desired

To have a more gently route and be able to go at their one pace.

INCLEMENT WEATHER

In the event of bad weather conditions, members should contact the organiser of the ride to ensure that it is still taking place.
